IMAGE TIME PROUD OF ITS “MADE IN USA” TRADITION

A Leader in Custom Branded Neon Clocks for Over 22 Years

PERRYOPOLIS, PA – With an ever-increasing number of American businesses moving their production facilities outside U.S. borders, it's becoming more difficult to find quality products with a “Made in USA” stamp on the box. Yet over the past two decades, a leading manufacturer of custom neon clocks located in southwestern Pennsylvania has established itself as a true American company.

Since 1989, Image Time, Inc. has been manufacturing custom-designed neon clocks for use in advertising and brand marketing by companies all over the globe. “Our success is rooted in the fact that we sell the highest quality products throughout the world and we make them right here,” said Bob McKeown, president of the company located 30 miles south of Pittsburgh. “Some of the very first clocks we made twenty years ago are still going strong.”

Originally involved with other business ventures, McKeown founded Image Time after - as he puts it - “a hobby went haywire.” A collector and aficionado of Packard automobiles, McKeown was given a Packard clock that hung in a dealership during the 1950's. He later added neon and displayed it at a car show in Hershey, PA where it received a tremendous response. He returned home with an order of 1,000 neon clocks for Lionel. Image Time was born.

Today, Image Time employs a talented staff to design, assemble and sell their line of clocks – which includes the classic 20-inch neon clock, 36-inch clocks with custom neon lettering, and even thermometers. Company logos, slogans and product images are typical choices to be printed on clock faces, but their graphic artists will design almost anything the client wants. From Anheuser-Busch to Zippo, Image Time has worked with businesses of every size in every industry to provide brand awareness via their vibrant timepieces. And they have been doing it proudly in America for 22 years and counting.

About Image Time: Image Time, Inc. is a manufacturer of custom-designed neon clocks used by businesses of every size in every industry for their point-of-sale marketing, brand promotion and employee appreciation programs. Each year, their factory in Perryopolis, PA produces thousands of hand-crafted neon clocks using premium aluminum, brass, and optical quality glass. You can find out more about this proud American company and their products by visiting their website at: www.neonclock.com.
