

IMAGE TIME PRESS RELEASE – 10/28/2011

IMAGE TIME, INC. – PROUD OF ITS “MADE IN USA” TRADITION

PERRYOPOLIS, PA – Image Time, Inc. has been in business since 1989 manufacturing the highest quality, custom neon clocks for worldwide companies. Used for Point of Purchase or Point of Sale advertising mostly, companies both large and small, have valued the fact that these clocks are American made!

“Our success is rooted in the fact that we sell the highest quality products throughout the world and we make them right here.” said Bob McKeown, president of the Pennsylvania-based company. Originally involved with another business venture of ball transfers, Bob started Image Time from scratch, saying Image Time developed “after a hobby went haywire!” With a long-time passion for the Packard automobile, a friend gave Bob a Packard clock that hung in a dealership back in the 50’s. From there, Bob created a 20” electric neon clock with the Packard logo, took it to the Hershey, PA car show and received tremendous response. The response was so great that he came home with an order for 1,000 Lionel neon clocks! Image Time was in business!

Over the years, Image Time, Inc. has served companies in many industries – everything from **A** (automobiles) to **Z** (Zippo lighters) for their advertising and promotions. Custom designing the faces, glass styles, colors make each clock unique and perfectly suitable for any business. Many clock importers of lesser quality neon clocks have recently closed their doors as clients seek the quality and hand crafting of American products. Located near Pittsburgh, PA, Image Time’s talented artists and professional staff are ready to meet your needs!
